SAFE STREETS FOR ALL SAN DIEGANS

EL CAJON BOULEVARD SAFETY ENHANCEMENTS PROJECT

3 SUPPLEMENTAL ACTIVITIES

QUICK BUILDS | SPEED MANAGEMENT | SLOW STREETS
PROJECT PARTNERS

Elected Officials:
- Mayor Todd Gloria
- U.S. Senator Dianne Feinstein
- U.S. Senator Alex Padilla
- Rep. Sara Jacobs (CA-53)
- Rep. Juan Vargas (CA-51)
- CA Senate President Pro Tempore Toni Atkins
- Assemblymember Akilah Weber
- Assemblymember Chris Ward
- County Supervisor Nathan Fletcher
- City Council President Sean Elo-Rivera

State & Regional Agencies:
- Caltrans
- SANDAG
- Port of San Diego
- North County Transit District (NCTD)
- San Diego Metropolitan Transit System (MTS)
- San Diego Unified School District
- San Diego Gas & Electric
- San Diego County Water Authority

Labor & Workforce:
- Li Una/Local 89
- San Diego Building Trades
- San Diego & Imperial Counties Labor Council

Community-Based Organizations:
- Bike SD
- Built Environment Team
- Circulate San Diego
- City Heights Area Planning Committee
- City Heights Community Development Corporation
- City Heights Town Council
- Climate Action Campaign
- El Cajon Blvd Business Improvement Association
- Little Saigon Foundation
- Mid-City Community Advocacy Network
- Partnership for the Advancement of New Americans
- Price Philanthropies
- San Diego Bike Coalition
- San Diego Chamber of Commerce
- San Diego State University (SDSU)
- San Ysidro Health
- Social Advocates for Youth San Diego
- VietVote

**Application Name**
Safe Streets for All San Diegans: El Cajon Boulevard Safety Enhancements Project and 3 Supplemental Activities

**Lead Applicant**
City of San Diego

**If Multijurisdictional, additional eligible entities jointly applying**
N/A

**Roadway safety responsibility**
- Ownership and/or maintenance responsibilities over a roadway network
- Safety responsibilities that affect roadways
- Have an agreement from the agency that has ownership and/or maintenance responsibilities for the roadway within the applicant’s jurisdiction

**Implementation Activity**
- 88.2%
  - Total Population of Project Census Tracts: 26,070
  - Total Population of Project Disadvantaged Census Tracts: 22,997

**Supplemental Action Plan Activity A**
- 100%
  - Total Population of Supplemental Action Plan Activity A Disadvantaged Census Tracts: 440,333

**Supplemental Action Plan Activity B**
- 37.8%
  - Total Population of Supplemental Action Plan Activity B Census Tracts: 1,389,165
  - Total Population of Supplemental Action Plan Activity B Disadvantaged Census Tracts: 440,333

**Supplemental Action Plan Activity C**
- 37.8%
  - Total Population of Supplemental Action Plan Activity C Census Tracts: 1,389,165
  - Total Population of Supplemental Action Plan Activity C Disadvantaged Census Tracts: 440,333

**Population in Underserved Communities**

**States(s) in which activities are located**
California

### Cost Total for Eligible Activity (A)

supplemental action plan activities in support of an existing Action Plan

- Cost Total of Supplemental Action Plan Activities: $850,000
  - Supplemental Action Plan Activity A - Historically Disadvantaged Community Equity Quick-Build Program: $500,000
  - Supplemental Action Plan Activity B - Comprehensive Speed Management Plan: $200,000
  - Supplemental Action Plan Activity C - Slow Streets Program: $150,000

### Cost Total for Eligible Activity (B)

conducting planning, design, and development activities for projects and strategies identified in an Action Plan

- TOTAL: $2,192,000

### Cost Total for Eligible Activity (C)

carrying out projects and strategies identified in an Action Plan

- TOTAL: $15,708,000

### Action Plan or Established Plan Link

- Vision Zero Resolution and Policy (Appendix A)
- Vision Zero Strategic Plan (Appendix B) (City Strategic Plan Website)
OVERVIEW

The City of San Diego requests $15 million to implement the proposed Safe Streets for All San Diegans: El Cajon Boulevard Safety Enhancements Project and 3 supplemental action plan activities to progressively improve the safety of all roadway users, especially in the City’s historically disadvantaged and underserved communities.

The City is proud to have adopted a Vision Zero (VZ) resolution and policy (see Appendix A) and VZ Strategy (VZ plan) (see Appendix B) — and is determined to implement them in historically disadvantaged communities. The Safe Streets for All San Diegans application builds upon the City’s VZ efforts through the following four key activities.

1 **IMPLEMENTATION: EL CAJON SAFETY ENHANCEMENTS PROJECT (PROJECT)**

Multimodal safety improvements along El Cajon Boulevard VZ priority corridor between Fairmont Avenue and Altadena Avenue, serving historically disadvantaged communities.

2 **SUPPLEMENTAL A: HISTORICALLY DISADVANTAGED COMMUNITY QUICK-BUILD PROGRAM**

Using public engagement techniques and collision data to identify community-supported quick build projects in disadvantaged communities throughout the City.

3 **SUPPLEMENTAL B: COMPREHENSIVE SPEED MANAGEMENT PLAN**

Utilize collision data to identify areas on the City’s high-injury network where speed is the leading collision factor and develop a plan that reduces speed limits and incorporates complementary educational outreach tools.

4 **SUPPLEMENTAL C: COMPREHENSIVE SLOW STREETS PROGRAM**

Identify and evaluate traffic calming initiatives to reduce the number and severity of collisions throughout the City, especially in neighborhoods with high pedestrian and bike activity to create safer, more walkable/bikeable communities.

The City’s proposed implementation grant is along El Cajon Boulevard—a centrally located commercial corridor housing 20% of San Diego’s population within a five-mile radius—with a distinct diversity of neighborhoods, small businesses, community-based organizations, and neighborhood schools. Historically, El Cajon Boulevard has been one of the most dangerous and challenging streets for users in the City—evidenced by collision data analyzed in the VZ Strategy. From 2015-2020, there have been 57 collisions involving bicyclists or pedestrians in just the 0.6 miles of the Project area, with 9 of those collisions being serious or fatal. El Cajon Boulevard continues to serve as a major connector poised to see thoughtful and community-focused transit-oriented developments within the next decade.

Existings conditions of El Cajon Boulevard

“In both cases, the pedestrians were crossing streets (El Cajon Blvd and University Ave) identified by Circulate San Diego as the most dangerous in the City when they were struck by a vehicle and killed.”

Circulate San Diego on two recent pedestrian deaths

The Project will implement a complete street design transforming an underserved portion of El Cajon Boulevard into a safe, comfortable, and accessible street for all users by incorporating proven safety countermeasures, ADA-compliant infrastructure, and traffic calming improvements aligned with the City’s VZ strategy. The Project is consistent with the City’s and US Department of Transportation (USDOT)’s priorities to promote multi-modal transportation, reduce greenhouse gas emissions, and increase equity and access for historically disadvantaged communities. The Project will also fulfill the goals of the Safe Streets and Roads for All Grant Program (SS4A) by implementing countermeasures known to reduce the severity and frequency of collisions on a high injury network in the City.
PROJECT DESCRIPTION

» PROJECT LOCATION

The Project and three city-wide Supplemental Activities are located within the City of San Diego in San Diego County, California. The Project provides 0.9 miles of vital safety and multi-modal improvements along El Cajon Boulevard from Fairmount Avenue to Altadena Avenue.

Figure 1: Project Vicinity Map

Census Tracts (CT) adjacent to the Project: 23.01, 23.02, 27.07, 27.08, and 28.03. Bolded CT are identified as a historically disadvantaged community per the Transportation Disadvantaged Census Tracts.

Figure 2: Historically Disadvantaged Communities Surrounding Project

Source: SS4A Underserved Communities Census Tracts (Historically Disadvantaged Communities)

» CORRIDOR CONTEXT

The Project limits were strategically selected to eliminate traffic fatalities, increase roadway safety and enhance mobility benefits for historically disadvantaged communities (i.e., City Heights and Little Saigon) and nearby schools such as Hoover High School. The Project segment has an average Walk Score of 89 (out of 100). However, the corridor is challenged with older pedestrian infrastructure and lacks convenient and safe crossing opportunities for users of different abilities. It was a highway (U.S. Route 80) previously and thus, retains older highway design elements that contribute to safety challenges and make the corridor unfavorable to many users.

KEY CORRIDOR CONCERNS

- High vehicle speeds
- Lack of safe pedestrian crossing locations
- Access control
- Lack of accessible and comfortable pedestrian facilities

Existing conditions of El Cajon Boulevard
» BUILDING ON PREVIOUS EFFORTS

The Project builds on the City’s long-standing commitment to create safer roadways for all users and implement complete streets that enable safe, attractive, and comfortable access to all within the public right-of-way.

In 2015, the City adopted a Vision Zero Resolution and Policy, which aims to reduce all traffic fatalities to zero by the Year 2025 (Vision Zero). To fulfill this vision, the City completed the Vision 2020-2025 Strategic Plan in 2020 to document the accomplishments since adoption of the VZ and the envisioned accomplishments for the program in the next 5 years to achieve zero severe injuries and fatalities. As part of these efforts, El Cajon Boulevard was identified as a priority corridor that needs improvements to address conditions that contribute to the number and severity of collisions. The Project is a priority project for the City as it supports, refines, and implements the recommendations from the City’s VZ efforts.

Key communities and stakeholders along the corridor that have been engaged in the planning process with the City are eager for the improvements as they will: boldly transform the transportation network, promote alternative travel options, create a complete street, and provide safe travel through and across El Cajon Boulevard.

These efforts include the City’s 1998 Mid-City Communities Plan, Pedestrian Master Plans from 2006 and 2015 (Volume 2A Urban Core Communities), and the El Cajon Boulevard Complete Planning Study (see Appendix C) completed in 2017. The Project also considers planned regional bicycle projects (Meade Regional Bikeway and Orange Regional Bikeway) in the Mid-City communities as well as ongoing collaboration with San Diego’s Metropolitan Transit System (MTS). The Project will also build upon recent construction on the corridor, such as recent improvements at Hoover High School, to maximize these investments. The City is committed to utilizing additional local, state, and federal funding opportunities to revitalize the full corridor of El Cajon Boulevard to ensure it is in line with the City’s embrace of complete streets.
The City is requesting **$14.32 million** to fund implementation improvements along El Cajon Boulevard (see Appendix D for the concept design). The Project will provide immediate safety benefits along El Cajon Boulevard as the proposed improvements aim to decrease crash rates through several corridor-wide improvements. The Project will fulfill the SS4A's program goals of reducing motorist, pedestrian, and cyclist injuries and fatalities.

**PROPOSED IMPLEMENTATION IMPROVEMENTS**

**CHALLENGES**

<table>
<thead>
<tr>
<th>CHALLENGES</th>
<th>PROJECT IMPROVEMENT</th>
</tr>
</thead>
</table>
| Lack of controlled pedestrian crossings; wide crossing distance with no refuge | • Crossing improvements to increase visibility & shorten distance (i.e., HAWK crossings and curb extensions)  
• Pedestrian refuge in median |
| High vehicle speeds (Faster than posted 35mph) | • Improve signage  
• Narrow field of vision through curb extensions, tree-lined sidewalks and medians to create a desired speed zone  
• Apply reflective borders around transit signal heads  
• Review reflective borders around transit signal heads  
• Pilot concept for the proposed Comprehensive Speed Management Plan |
| Lack of comfortable walking environment | • Pedestrian shade trees  
• Landscape and stormwater quality improvements |
| Older pedestrian infrastructure unable to serve users of different abilities | • Pedestrian refuges in the medians  
• ADA-compliant sidewalk improvements such as curb ramps and accessible push buttons |
| Lack of climate-appropriate landscaping | • Landscape and stormwater quality improvements  
• Drainage improvements and stormwater BMP improvements |
| Challenging pedestrian access and waiting areas for transit stops | • Reduce conflicts with raised median  
• Increase pedestrian visibility with red curb at driveways  
• Update traffic controller software to support pedestrian safety operations and transit signal priority  
• Implement lead pedestrian intervals (LPs) and Blank-Out “No Right Turns” (NRT) signs |
The City is requesting $680,000 to fund 3 city-wide supplemental action plan activities to continue the VZ policy and plan. The 3 proposed activities will continue the City’s shift toward the principles of systemic safety.

- Expand the City’s VZ by improving safety in high-risk areas
- Increase equity for historically disadvantaged communities and pedestrians with disabilities
- Collaborate and engage with diverse community members
- Carry on monitoring of collision data and past efforts to continue to implement data-driven safety solutions and strategies

### Historically Disadvantaged Community Quick-Build Program (Supplemental Action Plan Activity A)

Establish a program to help the City evaluate and identify quick-build safety projects on the high-injury network in the City’s historically disadvantaged communities.

- **TIME:** 12 months
- **TOTAL COST:** $500,000
- **SS4A Request:** $400,000

**What does this activity entail?**
- Identify locations with high crash rates in disadvantaged communities through a targeted equity assessment and innovative data analysis
- Incorporate community engagement, outreach and collaboration to identify safety solutions that better serve the needs and concerns of community members

**Why is this activity important?**
- 38.2% of the City is considered a Historically Disadvantaged Community
- Promote equity by investing in the safety needs of underserved communities
- Collect and monitor data from low-cost quick-build solutions to inform future long-term projects

### Comprehensive Speed Management Plan (Supplemental Action Plan Activity B)

Develop a comprehensive speed management plan that reduces speed limits and includes complementary tools such as education, outreach, and traffic calming.

- **TIME:** 12 months
- **TOTAL COST:** $500,000
- **SS4A Request:** $400,000

**What does this activity entail?**
- Identify areas on high-injury network where speed is the leading collision factor
- Identify areas with high pedestrian/bicyclist activity that would benefit from lower speed limits
- Develop outreach and behavioral engagement strategies that will encourage speed limit adherence

**Why is this activity important?**
- Educate community members to proactively prevent crashes
- Reduce speeds to mitigate human mistakes and behavior that occur at high speeds and impact crash survival and injury severity
- Improve safety with low-cost solutions and educational initiatives

### Comprehensive Slow Streets Program (Supplemental Action Plan Activity C)

Create safe community spaces by evaluating and identifying traffic calming initiatives in neighborhoods with high pedestrian and bike activity.

- **TIME:** 12 months
- **TOTAL COST:** $500,000
- **SS4A Request:** $400,000

**What does this activity entail?**
- Create safe shared spaces allowing residents get around their neighborhoods for essential travel
- Model after successful existing slow street program in Pacific Beach that increased bicycle activity by 30%

**Why is this activity important?**
- Improve safety for all road users with data-informed, effective proven safety countermeasures
- Encourage and increase the accessibility of multimodal transportation
- Create a pedestrian/bicyclist-oriented community that encourages the City’s vibrant communities to grow and flourish
RESPONSE TO CRITERIA

» CRITERIA #1: SAFETY IMPACT

The Project would complete a critical step towards helping the City reach its VZ goals and improve safety for all people who use El Cajon Boulevard. The Project incorporates proven low-cost, high-impact safety countermeasures, and transformative design solutions to reduce the frequency and severity of collisions. Each proposed improvement was strategically selected to address observed safety concerns and transform the corridor to better serve its community, creating a place for people of all ages and abilities to thrive.

SAFETY PROBLEM: El Cajon is a key community corridor that thousands of people rely on to access schools, jobs and housing. However, the corridor experiences a high quantity and severity of crashes. It is a VZ high-priority corridor, and transformative improvements are critical to reduce and eliminate fatalities and severe injuries.

Fatal and injury-related collisions were pulled for the corridor using Transportation Injury Mapping System (TIMS) Statewide Integrated Traffic Records System (SWITRS) GIS Map tool for a 5-year period (2016-2020) (see Appendix E for the outputs obtained). A 100-foot buffer was utilized to obtain intersection-related collisions for the Project. Below are key collision findings for the corridor.

<table>
<thead>
<tr>
<th>MOST COMMON CRASH TYPES</th>
<th>MOST COMMON CRASH FACTORS</th>
</tr>
</thead>
<tbody>
<tr>
<td>Broadside 35%</td>
<td>Signals/Signs 35%</td>
</tr>
<tr>
<td>Rear End 21%</td>
<td>Improper Turning 35%</td>
</tr>
<tr>
<td>Vehicle/Pedestrian 14%</td>
<td>Automobile ROW 25%</td>
</tr>
</tbody>
</table>

SAFETY IMPACT ASSESSMENT: The proposed improvements were based off the City’s VZ plan and complete street best practices, and supported by the Federal Highway Administration’s Proven Safety Countermeasures and Caltrans 2022 Local Roadway Safety Manual.

<table>
<thead>
<tr>
<th>IMPROVEMENT</th>
<th>SAFETY BENEFIT</th>
</tr>
</thead>
<tbody>
<tr>
<td>Signalized Pedestrian Crossing</td>
<td>Provide controlled pedestrian crossings to create more opportunities to cross El Cajon Boulevard safely.</td>
</tr>
<tr>
<td>Curb Extensions</td>
<td>Visually and physically narrow the roadway, creating shorter and safer crossings for people walking at intersections.</td>
</tr>
<tr>
<td>Median</td>
<td>Control access to reduce vehicle conflicts and limit (or restrict) left turns to and from El Cajon Boulevard to controlled intersections.</td>
</tr>
<tr>
<td>Traffic Signal at Estrella Avenue</td>
<td>Provide traffic signal to improve safety at the intersection; recommended with the installation of the proposed median between Euclid Avenue and Winona Avenue.</td>
</tr>
<tr>
<td>Coordinated Signals</td>
<td>Coordinate corridor signal timing to encourage safe travel speeds.</td>
</tr>
<tr>
<td>Leading Pedestrian Intervals &amp; Blank-Out “No Right Turn” Signs</td>
<td>Reduce conflicts between people walking and drivers turning across the pedestrian path of travel.</td>
</tr>
<tr>
<td>Reflective border around traffic signal heads</td>
<td>Improve the visibility of traffic signals to help drivers more safely navigate the intersection, reducing broadside and read-end crashes.</td>
</tr>
<tr>
<td>Pedestrian Refuge Islands</td>
<td>Allow people crossing the street to cross one direction of travel at a time and reduce roadway exposure time, helping to create a more comfortable walking and biking experience.</td>
</tr>
<tr>
<td>Install Red Curb</td>
<td>Improve visibility of people walking, biking, scooting and driving along El Cajon Boulevard at select driveways and intersections.</td>
</tr>
<tr>
<td>ADA Access Improvements (i.e., signals, curb ramps &amp; sidewalk)</td>
<td>Improve access and safety along the corridor for people with vision impairments and different physical abilities. Upgrade all signalized intersections to Audible Pedestrian Signals.</td>
</tr>
<tr>
<td>Corridor Transformation</td>
<td>The proposed curb extensions, median, and stormwater BMP landscaping will physically and visually narrow the roadway, encouraging slower vehicle travel speeds, which helps make the corridor safer for everyone.</td>
</tr>
</tbody>
</table>
The study was solicited through the following approaches:

- The walk audit allowed for community members to view and provide feedback regarding the project area in real time, on location.
- The focus group meeting mainly involved the Little Saigon Foundation, where foundation members voiced their desire for the strong Vietnamese culture that is present in the area to be included in the proposed redesign.
- A door-to-door survey, in partnership with the El Cajon Boulevard Business Improvement Association and Little Saigon, allowed the small business owners that drive much of the economic activity of the area to provide input on design elements that could affect their business.
- Two large public meetings and multiple ad-hoc working group meetings allowed for direct public input on the safety issues/concerns and potential solutions to make the safer corridor for all roadway users.

Key takeaways from the outreach included a desire to:

- Maintain effective traffic operations along the corridor
- Improve the environment and facilities for pedestrian, bike, and transit users

To encourage participation, outreach included:

- Translations in prominent languages (Spanish and Vietnamese)
- Events at various times and locations to maximize participation
- In-person announcement distribution, personalized for community members and stakeholders

Ad-hoc working group participation included reviews and discussion on improvement options—these working groups included Business Improvement Association, Little Saigon, Circulate San Diego, the City Heights Community Development Corporation, and other neighborhood stakeholders.
» CRITERIA #3: EFFECTIVE PRACTICES & STRATEGIES

The Project incorporates a Safe System Approach through evidence-based roadway safety infrastructure and proven safety countermeasures and creates an environment that encourages adherence to safe speeds and provides more comfortable facilities.

The Project proposes traffic signals that are timed and coordinated to maintain efficient traffic operations at calmer traffic speeds—reinforcing positive driver behavior for traveling at or below the speed limit. These calmer speeds will support 1) driver awareness for vulnerable users, 2) reduce the severity of collisions, and 3) reduce the probability of fatalities and severe injuries.

The City’s Complete Streets approach is also addressed throughout the Project, creating a more walkable environment through shade, landscaping, and refuge islands. It also means incorporating bike parking at key destinations and crosswalk visibility enhancements. To improve accessibility, ADA-compliant sidewalks, curb ramps, and accessible push buttons will be constructed. The plan also involves supplemental planning activities to further the City’s a VZ initiatives.

Figure 8: Supporting Safe Routes to Hoover High School from Historically Disadvantaged Communities in the School Boundary

![Map of safe routes to Hoover High School](image-url)
**CRITERIA #4: CLIMATE CHANGE/SUSTAINABILITY & ECONOMIC COMPETITIVENESS**

The Project will transform El Cajon Boulevard and provide safe access to:
- Hoover High School
- Community-based organizations (example: San Ysidro Health)
- MTS Rapid (a federally funded high-capacity transit corridor) - Connecting San Diego State University and Downtown San Diego to the Project area
- 1,000 plus locally owned businesses

The proposed recommendations would catalyze meaningful and transformative investments on El Cajon Boulevard to promote beautiful, vibrant, and welcoming areas for shopping, eating, neighborhood services, and pedestrian activity for residents and visitors.

**CLIMATE CHANGE/SUSTAINABILITY**

The Project proposes to implement storm water BMPs to meet regional water quality needs. The BMPs will incorporate sidewalk and median street trees to provide shade (a more comfortable and inviting pedestrian experience) and reduce greenhouse gas and heat island effects. The proposed BMP landscape will utilize drought-tolerant native trees and vegetation. Where feasible, the project construction will incorporate low-carbon pavement and construction materials, including recycled materials.

The Project will implement transit signal priority along the entire corridor to reduce delays at signals for MTS Rapid services, making transit more efficient to corridor users. Signal timing improvements and synchronization will promote continuous traffic flow, minimizing idling time and reducing greenhouse gas emissions.

The transformative corridor improvements will help make walking and biking safer and more comfortable, reduce growth in vehicle miles traveled, and help the City meet its mode share goals as stated in the City’s Climate Action Plan.

**ECONOMIC COMPETITIVENESS**

The Project promotes economic opportunity to historically disadvantaged communities by:
- Creating an inviting multimodal corridor, encouraging economic vitality
- Connecting people to local and regional job centers

The Project corridor is home to many businesses and destinations, and with this Project is primed for community-focused and transit-oriented development. The Project area requires thoughtful development of a safe environment and efficient traffic flow. The Project approaches improvements with a Safe Systems Approach and targeted technology deployment.

A more comfortable experience will allow pedestrians to interact with and enjoy the corridor environment, including existing and future businesses. Twenty-five percent of the community live in poverty and will directly benefit from improvements to public transportation. Through MTS Rapid, these community members will have an affordable transportation option to school, work, and healthcare.

**LABOR & WORKFORCE**

The City is committed to strong labor standards and union representation in the development of this project by promoting equal employment and subcontracting opportunities within all aspects of City contracting. The City requires contractors and subcontractors to hire registered apprentices from approved apprenticeship programs on all of its public works contracts. The City recently created the Office of Labor Standards Enforcement (OLSE) to uplift health and safety labor standards, effectively enforce labor laws, and protect workers and citizens by combining oversight of the Minimum Wage and Earned Sick Days, Prevailing Wage, Living Wage and Labor Compliance programs.
PROJECT READINESS

Within 5 years, the City will be able to successfully implement the proposed improvements along El Cajon Boulevard (Project). Due to the alignment with the VZ Policy and VZ Strategy and the Project’s support from partner agencies and stakeholders, the Project will be a priority for the City. The City is committing 20% of funds through local funding sources such as TransNet and City Funds (i.e., City discretionary CIP funds and City DIF/FBA funds).

PROJECT PROCESS

The City is prepared and ready to execute the Project within 5 years of when the grant is executed. The Project will complete environmental, design, right of way, and construction by 2027 as indicated in the schedule. The following environmental requirements are expected:

NEPA – Categorical Exclusion expected to be processed through Caltrans Local Assistance
  • Phase II Preliminary Site Assessment
  • Transportation Impact Analysis Report
  • Visual Scoping Memo
  • Parking Impact Technical Memorandum
  • Community Impact Assessment Memorandum
  • Cultural resources

CEQA – Categorical Exemption (City to make final determination)
  • Potential options for technical memos include:
    • Hazardous materials tech memo
    • Hydrology & water quality tech memo
    • Transportation tech memo
    • Cultural Resources

» RISKS AND MITIGATIONS

During the design and construction, the Project Manager (PM) and Construction Manager (CM) will oversee, manage, and control the budget, scope, and schedule in accordance with procedures outlined in state and federal manuals and City policies/standards. The City has formal risk management practices in place including identification, response strategies, monitoring, and control. As with any capital improvement project, the City regularly assesses risk at various stages and will continue to monitor risk throughout the construction and closeout.

» SCHEDULE OF ACTIVITIES AND MILESTONES

It is expected the City would proceed with the project in June 2023. Preliminary work will take place until 2025 including design, environmental, and internal review. Construction will occur for the next two years with five months left for closure.

The City of San Diego has the following resources needed to accomplish this project on time and within budget:
  • Dedicated staff for project development and community collaboration
  • Subject matter experts
  • Political, community, and internal support
  • Experience implementing similar improvements
  • Stable funding
  • Partnerships with other agencies
SELF-CERTIFICATION

The City is a qualified applicant for the SS4A implementation grant and supplemental action plan activities. Appendix H for the completed self-certification eligibility worksheet.

**Instructions:** This content is from Table 2 in the NOFO. The purpose of the worksheet is to determine whether or not an applicant’s existing plan(s) is substantially similar to an Action Plan.

- For each question below, answer “yes” or “no.” If “yes,” cite the specific page in your existing Action Plan or other plan(s) that corroborate your response, or cite and provide other supporting documentation separately.
- An applicant is eligible to apply for an Action Plan Grant if funds supplemental action plan activities, or an Implementation Grant, only if the following two conditions are met:
  - Answer “yes” to Questions 3, 4, 5, and 6.
  - Answer “yes” to at least four of the six remaining Questions 1, 2, 7, 8, 9, and 10.

If both conditions are not met, an applicant is still eligible to apply for an Action Plan Grant that funds creation of a new action plan.

**Lead Applicant:** City of San Diego

BUDGET & FUNDING

The City of San Diego requests $15 million of SS4A funding to help implement the proposed implementation activity and three supplemental action plan activities described in this application. The total costs for the implementation activity and three supplemental action plan activities is $18.75 million. Table 1 shows a breakdown of the total cost estimate, total SS4A funding federal share and total non-federal share funds for each activity. The City is committed to a 20% match of $3.75 million using non-federal share funds as shown in Table 2. The City is committed to ensuring that the implementation activity and supplemental action plan activities contribute to addressing safety issues in historically disadvantaged communities. About $16.42 million of the total costs are estimated to serve underserved communities.

Funds to Underserved Communities

The implementation and supplemental action plan activities will help address safety issues for underserved communities. The needs of disadvantaged communities were taken into careful consideration during the development of this application. The following amounts will be spent to make underserved areas safer:

$500,000 (100%) of the supplemental action plan activity A budget

$75,600 (38%) of the supplemental action plan activity B budget

$56,700 (38%) of the supplemental action plan activity C budget

$15,787,800 (88%) of the implementation activity (Project) budget
